

CLASSIFICATION PARAMETERS OF SANTANDER SCHOLARSHIP PROGRAMME OFFERS

Thank you very much for using Becas Santander! If you are wondering how we order or classify the offers of the Scholarship Programmes published on our Portal, you can consult the criteria we use below.

Basically, we use three criteria, ordered from most to least relevant:

- (i) Weight. This takes into account factors such as your location (IP address), the status of the Programme or the relevance of the Programme in our opinion. That is, we will give priority to those programmes that will take place near you over those that are organised abroad, and we will also give priority to programmes that are currently open over those programmes whose enrolment period will start soon and those that have already finished.
- (ii) Number of scholarships offered in the Programmes. In the event that two programmes have the same "weight", we will show above the Programmes with the highest number of scholarships offered.
- (iii) Date of creation. If there is equality in the two previous criteria, we will show first those Programmes that have been created more recently.

We hope you find this information helpful.

Yours sincerely,

The Santander Scholarships Team
